******Current Accreditation Information******

Offices accredited prior to January 1, 2011, will not be responsible for maintenance fees until they become reaccredited.

The IACME now offers accreditation for offices of all sizes. This certification process provides coroner and medical examiner offices the opportunity to conduct a self-assessment and subsequently have auditors, trained by the association, to review the applicable standards.

The procedure allows coroner and medical examiner offices to ensure they are conducting business practices and procedures in compliance with national standards.

ACCREDITATION REQUIREMENTS: Once an office commits to this level of professionalism there are several steps that must be followed to complete accreditation. Please be aware that you have one year from the date you applied in order to receive an audit. Failure to submit accreditation information and request audit within one year will result in being charged another application fee.

****Note: The current fee structure applies to the Accreditation Process as well as the Re-Accreditation process.**
